PROJECT REPORT

Student Name:

Team:

Team member evaluation:

The due date for this project is approaching quickly. When is your next scheduled group meeting?

Is there anything you would change about how you have approached this group project as an individual? If so, explain:

Report the following:

How will the mast head (31) attach to the crankshaft bearing block (28)? Provide specific relevant details.

How can one prevent datums and datum CSYSs from showing up in a working drawing in NX?

The drawing below is a solid cylinder. Circle the view that is dimensioned correctly.
